

## 2010 CALIFORNIA CONCRETE PAVEMENT WORKSHOP

Brought to you by Caltrans, Federal Highway Administration, UC Berkeley Tech Transfer, and ACPA-Southwest, this workshop covers basic and advanced topics of Concrete Pavements. Workshop topics cover design, maintenance, construction, smoothness and ride quality, environmental benefits, and fuel economy improvements to be gained from the use of Concrete Pavements. Nationally recognized speakers from around the country will be presenting the latest findings and trends.

This workshop is for designers, maintenance personnel, engineers, decision makers, contractors, and material suppliers. Exhibitors will be featured in the General Session room.

Registration is available at <http://www.acpa-southwest.org>

### DATE

October 6, 2010

### LOCATION

Kellogg West Center, Cal Poly Pomona

### AGENDA

Opening Remarks/ General Session  
Implementation of Concrete Pavement Strategies  
FHWA Concrete Technologies and Implementation Strategy –Gary Crawford, FHWA  
Caltrans Perspective – Dr. Ray Wolff, Caltrans District 8  
City/County Perspective on Concrete Pavements

Breakout sessions: CONCRETE SPECIFICATIONS THAT AFFECT YOU and PAVEMENT PRESERVATION

Caltrans Section 40 and 90 Changes  
LA Greenbook specifications  
Diamond Grinding  
Preservation Strategies Using Rapid Strength Concrete

Buffet Lunch with Presentation “Concrete Pavement Strategies in District 11” Mr. Gary Gallegos

Breakout Sessions : PAVEMENT DESIGN and ENVIRONMENTAL SOLUTIONS

How Thin Can You Go?  
Life Cycle Costs Analysis – New Trends that will Shock You  
Concrete Pavement’s Role in S.B. 375 Implementation  
Effects of Pavement Type on Fuel Efficiency and Emissions
