DESCRIPTION – Entities that manufacture or supply essential materials (other than Portland cement, supplementary cementitious materials, or ready mix concrete) for use by contractors directly in pavement construction, rehabilitation or maintenance are eligible for this category. After joining, all members shall be deemed to have agreed to be bound by the Association’s Articles of Incorporation, bylaws, policies approved by the Board of Directors, affiliation agreements with chapters or affiliates of the Association, and all obligations contained in any of those documents. All memberships are considered active unless a resignation letter is received in writing at the Association headquarters office.

PLEASE NOTE THAT ACPA MEMBERSHIP IS 100% TAX DEDUCTIBLE:

The American Concrete Pavement Association (ACPA) is a 501(c)6 organization that serves as the concrete pavement industry’s national voice to create and maintain a strong national presence, strategic leadership; effective technical expertise and resources; and persuasive advocacy. For federal tax purposes, contributions to the ACPA are a 100% deductible business expense. No portion of your dues or contributions will be expended for registered lobbyists or for business that is unrelated to the Association’s mission.

PLEASE NOTE OUR COMMITMENT TO RESEARCH:

ACPA maintains a commitment to research on behalf of the industry, investing at least ten percent of its budget annually. Any voluntary member contribution designated for research is directed toward on-going research funded directly by ACPA, or is directed to the Innovative Pavement Research Foundation (IPRF), a 501(c)3 organization operated by ACPA for the restricted use of funding research and technology transfer, primarily through the National Concrete Pavement Technology Center. The IPRF applies its efforts on projects that meet the strategic intent of the concrete pavement industry. Priority is given to pooled research programs and filling gaps identified by the Concrete Pavement Research Roadmap.

In 2011, ACPA is funding the following research and research technology transfer activities:

- **Joint Deterioration** – A pooled fund project led by the National Concrete Pavement Technology Center, which is solving a material deterioration problem that has been found in the North and Midwest states. The problem manifests at the joints and is considered a premature deterioration that threatens municipal and urban area pavements.
- **Next Generation Concrete Texture** – an effort shared by the ACPA and its partner, the International Grooving and Grinding Association to develop and introduce a new, quiet concrete pavement texture for existing concrete highways.
- **Technology Transfer** – ACPA is contributing to a training initiative directed at engineers and agency decision makers that is being undertaken by the National Concrete Pavement Technology Center. The goal is to educate engineers on concrete overlays, concrete pavement preservation, and other high-priority research implementation and technology advancements. In addition, ACPA is developing a training program specifically directed at contractor quality and workmanship issues and that will cover all aspects of design and construction for contractor personnel.

PLEASE COMPLETE THE DUES PAYMENT INFORMATION:

❶ Determine annual national dues based on your company’s sales volume (from the prior year) to the concrete paving market (circle one):
